Customer Date

**Terms**

1. Water will be obtained from a fire hydrant located at \_\_\_\_\_.
2. Fire hydrants shall be operated in the full open position at all times. Hydrant valve shall be operated slowly during the first 8-10 turns and likewise closed slowly in the same manner to prevent potential water hammer damage.
3. Applicant shall have a backflow device/vacuum breaker installed on hose/tank prior to obtaining water and shall turn the fire hydrant to the full off position when finished.
4. A \$50.00 hydrant meter set-up fee will be charged. If water is to be needed more than one day, the meter will be removed by City personnel at the end of each day and re-installed the next day. Each meter re-install will be charged a \$50.00 fee.
5. City Personnel will read the meter each time the hydrant is installed and removed.
6. The fee for bulk water is \$10.00 per 1,000 gallons in addition to the meter set-up fee(s).
